

### **ORAL AND DENTAL HEALTH**

It is important that pupils should have regular dental inspections and that these and any treatment required be carried out during school holidays.

In exceptional circumstances the School links with a local Dental Practice, which offers private emergency treatment for pain relief and damage caused by accident or disease. Any dental fee incurred is payable by you, please.

Orthodontic treatment can be accessed or monitored only if the child is referred directly by his / her own dental consultant. The Bootham School health team **will not** undertake to organise referrals. All orthodontic appointments should be carried out in school holidays. However, if in exceptional circumstances routine orthodontic treatment needs to be undertaken in school time, pupils should be accompanied to appointments by a parent or guardian. Only in cases of emergency will pupils be accompanied by a member of the health care support team. Any orthodontic fee incurred is payable by you, please.

**Please ensure the dental certificate form overleaf is fully completed prior to school entry, thank you.**
